ABOUT US

Research first. Conviction second. Everything else after.

A SEBI-registered Portfolio Management Service, practising value investing since 2019.

We buy businesses, not stocks — and only when the price is wrong. Two things follow from that: we own very few of them, and we hold them for years.

YEARS OF COMBINED RESEARCH EXPERIENCE	MANAGEMENT INTERACTIONS	COMPANY VISITS	INDUSTRY INTERACTIONS

We go and look

Our analysts spend the year on the ground — the factory floor, the dealers, the promoter's room.

We stay small on purpose

Concentration is a decision, not an accident. A handful of businesses, known deeply.

We are paid to perform

On Multicap our income is a share of what your portfolio gains. If it does not grow, we are not paid.

INVESTMENT PHILOSOPHY

We are value investors.

We buy businesses, not stocks — and we buy them only when the price is wrong.

Price is what you pay. Value is what you get.

The method is Graham's, as Buffett refined it: treat every holding as a share in a business, work out what that business is honestly worth, and buy it for meaningfully less. We look for durable competitive advantage, honest and able management, and earnings that reinvest at a high rate of return — among small, micro and emerging companies, where the discount is still there to be found.

Is it the right business?

Before anything else, the market has to be big enough to be worth the work.

A large, growing market

A total addressable market big enough to sustain a decade or more of growth.

Self-sustainable growth

Growth financed by the company's own retained earnings, not by debt or dilution.

Reinvestment opportunity

Room to reinvest profits at high returns, protected by a durable moat.

THE 4M FRAMEWORK

Four tests. No exceptions.

Every holding must clear all four — a filter, not a score.

M1

Moat

Durable competitive advantage — technology leadership, brands, cost efficiency, pricing power and high barriers to entry.

We pass on businesses whose only advantage is being early.

M2

Management Quality

Integrity, capital allocation discipline and a long view. In a small company the promoter is the strategy, so we spend more time on the person than the projection.

Governance concerns end the analysis, however good the numbers look.

M3

Margin of Safety

We buy only where price sits well below our estimate of intrinsic value. That gap is what absorbs the mistakes we will inevitably make.

A great business at the wrong price stays on the watchlist.

M4

Multiple Expansion

Improving earnings quality and competitive position re-rate over time. We aim to own that before the market fully recognises it.

We will not underwrite a re-rating that needs the story to stay perfect.

STRATEGY ONE — MULTICAP ADVANTAGE

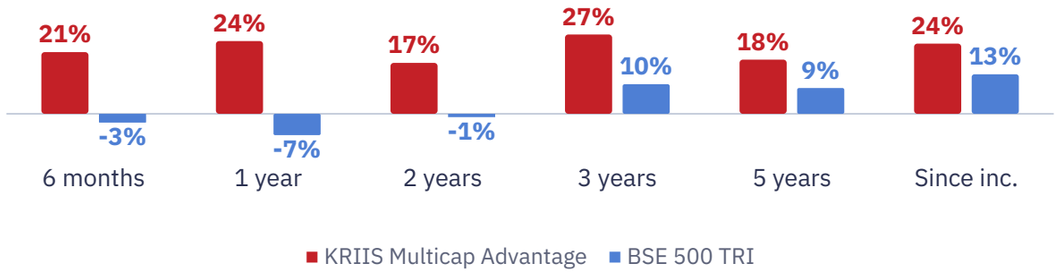

KRIIS Multicap Advantage

A sector-agnostic portfolio of researched businesses, bought across market capitalisations with a deliberate bias toward small, micro and emerging companies.

FEE STRUCTURE — MULTICAP ADVANTAGE

We are not paid to hold your money.

Only to grow it. There is no management fee on KRIIS Multicap Advantage — we are paid a share of your gains, and nothing else.

0%	12.5%	HWM
MANAGEMENT FEE	PROFIT SHARING	HIGH WATER MARK
Nothing is charged on the capital you place with us. No entry load, no exit load, and no lock-in period.	A share of the gains your own portfolio makes, and of nothing else. Charged annually.	Your portfolio must beat its own previous peak before a fee applies again.

You never pay twice for the same gain. If the portfolio falls, we earn nothing on the recovery until it has passed the highest value on which a share was last taken. Brokerage, custody, statutory charges and GST apply in addition, and are set out in full in the Disclosure Document.

STRATEGY TWO — HIGH GROWTH

KRIIS High Growth

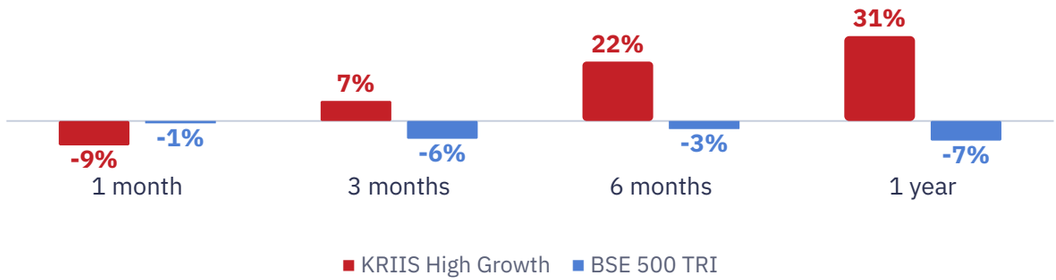

A tightly concentrated portfolio built around the firm's highest-conviction ideas, for investors who can carry concentration risk over a full market cycle.

20% Maximum weight in any one stock, at the time of investment

FEE STRUCTURE — HIGH GROWTH

A flat fee, and nothing else.

KRIIS High Growth is priced the other way round — a single management fee, with no share of the profit however the strategy performs.

1%

MANAGEMENT FEE

Charged on assets under management, and billed annually.

Nil

PERFORMANCE FEE

No profit share, whatever the strategy returns in a given year.

Why the two are priced differently

Multicap is an open strategy where our incentive should sit with your gains, so we take nothing unless the portfolio makes a new high. High Growth is closed, tightly concentrated and run for a small group of investors who have already accepted that concentration — so it carries a flat, predictable fee instead of a profit share.

Brokerage, custody, statutory charges and GST apply in addition, and are set out in full in the Disclosure Document.

THE CORE TEAM

Small enough that everyone knows every holding.

Four people make the investment decisions, supported by a research desk on the ground.

CA Rakesh Doshi

FOUNDER & FUND MANAGER

A Chartered Accountant with over 23 years in equity investing and an ICAI-certified Wealth Manager. He founded KRIIS and leads its philosophy and process.

Sridhar Iyer

CHIEF INVESTMENT OFFICER

Leads investment decision-making and portfolio construction. Previously Director of Equity at B&K Securities and a Research Analyst at Motilal Oswal.

Abhishek Jain

CO-FUND MANAGER

Over 20 years across equity research, fund management and capital markets. Previously with HDFC Group, Dolat Capital and Alfa Accurate.

Bhavya Doshi

MANAGING DIRECTOR

A CFA charterholder and a 2022 graduate of Bentley University, Boston. Contributes to investment strategy, valuation and behavioural finance.
